Professional hairdressing scissors
Japanese steel

SCISSORS DESIGNED FOR THE WAY YOU WORK.

Founded in France in 2009, Dune Scissors was born from a simple ambition: to offer hairdressing professionals scissors that combine **precision, ergonomics, performance and durability**, at a fair price.

For more than 15 years, we have designed high-performance cutting tools, field-tested and approved by expert hairdressers.

Today, Dune Scissors supports professional hairdressers in more than 10 European countries.

COLLECTION

AMBITION

FORGED 440C STEEL — 59 HR^{C**}

Sharpness, reliability and comfort: the essential qualities of a professional tool designed for everyday use, within a manageable budget. This collection supports hairdressers looking for high-performing scissors, without compromising on effectiveness.

Forged 440C steel, with a hardness of 59 HRC, combines strength, wear resistance and lasting edge retention. Hollow-ground blades and hand-finished convex edges without a bevel ensure clean, smooth and precise cutting.

With its cutting and texturising models, you can choose a tool that suits your movements and technical needs. An accessible, versatile collection that brings the reliability and comfort of a good pair of scissors to your everyday work.

109€ EXCL. VAT*

One price for every
size and model.

* Recommended salon price. ** Rockwell scale: steel hardness.

AMBITION

ALFA

Balance, finesse and lightness.

The classic, symmetrical design feels light and balanced in the hand. Slim hollow-ground blades, combined with convex edges, allow precise work on small sections and fine hair.

The alignment of the finger rings and blades helps you create straight, clean lines. Versatile, these scissors support fundamental cutting, slicing and point-cutting techniques.

-
- **Forged 440C steel, 59 HRC**
 - **Lightweight and balanced**
 - **Fine hollow-ground blades with convex edges for small sections and fine hair**
 - **Two removable finger rests**
 - **Cutting, slicing and point cutting**
 - **Hand: Right-handed / left-handed**
(for left-handed stylists accustomed to symmetrical handles)
 - **Size [inches]**

DIVA

DIVA

Comfort meets technical control.

The slightly curved thumb ring feels immediately comfortable and naturally supports your movements, especially when cutting flat tops. The integrated finger rest stabilises your grip for controlled cutting.

The fine, precise tip suits point cutting and detailed finishing. A versatile tool for moving comfortably between fundamental techniques.

-
- Forged 440C steel, 59 HRC
 - Hollow-ground blades with smooth convex edges
 - Curved thumb ring for comfort
 - Fine, precise tip
 - Integrated finger rest
 - Point cutting and finishing
 - Hand: Right-handed
 - Size [inches]

FARO

FARO T40

Simply effective.

The curved thumb ring and integrated finger rest provide a natural, stable grip. These texturising scissors support blending, evening out layers and precise finishing.

Their 40 straight teeth remove 20 to 30 % of hair for smooth, controlled thinning throughout the hair.

-
- Forged 440C steel, 59 HRC
 - 40 straight teeth
 - Removes 20 to 30% of hair
 - Curved thumb ring and integrated finger rest
 - Blending and finishing
 - Hand: Right-handed
 - Number of teeth

40

GOLF T33

For expert texturising and creating softer structure.

The straight, symmetrical design and two removable finger rests provide a comfortable grip. Reversible use lets you work with the teeth facing upwards at the surface, or downwards to work deeper into the hair.

With 30 % hair removal, these texturising scissors support texturising, deconstruction and shaping volume.

-
- Forged 440C steel, 59 HRC
 - 33 teeth, removes 30% of hair
 - Teeth facing up or down
 - Two removable finger rests
 - Texturising and shaping volume
 - Hand: Right-handed / left-handed
(for left-handed stylists accustomed to symmetrical handles)
 - Number of teeth

33

NGAF

LIMA T40

Precise thinning. Controlled volume.

The offset handle design and integrated finger rest encourage a natural grip for removing bulk, thinning and shaping volume. Removing 25 to 30 % of hair allows controlled blending and texturising.

Versatile, these texturising scissors support texturising, deconstruction and finishing techniques, with a comfortable feel suited to everyday work.

LIMA

-
- Forged 440C steel, 59 HRC
 - 40 teeth, removes 25 to 30% of hair
 - Offset handle
 - Integrated finger rest
 - Thinning and volume control
 - Hand: Right-handed
 - Number of teeth

40

RUBY

Lightness, precision and finesse.

Light and easy to handle, these scissors combine an offset handle design with a curved thumb ring and integrated finger rest. Slim hollow-ground blades with convex edges allow precise work on small sections and fine hair.

Their versatility supports fundamental cuts and advanced techniques: slicing, point cutting, blending and creative finishing.

-
- Forged 440C steel, 59 HRC
 - Lightweight and easy to handle
 - Fine hollow-ground blades with smooth convex edges
 - Curved thumb ring and integrated finger rest
 - Creative cutting and finishing
 - Hand: Right-handed

COLLECTION

ORIGIN

JAPANESE SUS 440C STEEL — 60 HRC**

Dune's original, founding collection embodies craftsmanship focused on reliability, strength and the pleasure of cutting. A balance of versatility, ergonomics and lasting sharpness, so you can practise your craft with confidence at a fair price.

Japanese SUS 440C steel, with a hardness of 60 HRC, offers excellent wear resistance and crisp, clean, powerful cutting right to the tips, even through dense or thick hair. Hollow-ground blades and hand-finished convex edges ensure smoothness and precision across different cutting techniques.

The variety of cutting and texturising models accommodates different hand shapes and salon needs. To preserve the tool's qualities over time, one complimentary sharpening and full service are included, with no time limit for claiming them.

Aero

COLLECTION ORIGIN | CUTTING SCISSORS

AERO

A men's hairdressing essential: precision in the fundamentals.

The straight, symmetrical, reversible design supports learning and mastering fundamental techniques. The alignment of the finger rings and blades provides a guide for clean lines, particularly in men's hairdressing and scissor-over-comb work.

The classic geometry makes it easy to switch from blunt cutting to point cutting. Four sizes let you adapt the blade length to detailed work and larger sections.

-
- Japanese SUS 440C steel, 60 HRC
 - Hollow-ground blades with convex edges
 - Classic reversible design
 - 4 sizes, up to 6.7"
 - Blunt cutting and scissor-over-comb work
 - 1 complimentary sharpening and full service, with no time limit for claiming it
 - Hand: Right-handed / left-handed
(for left-handed stylists accustomed to symmetrical handles)

Grey

COLLECTION ORIGIN | CUTTING SCISSORS

GREY

Power with a distinctive signature.

The grey tones of the titanium coating highlight lines with a distinctive character. Powerful hollow-ground blades with convex edges provide a clean cutting edge suited to thick hair, layers and beard trimming.

The curved thumb ring encourages a natural grip for intensive use in the salon or barbershop. Both sizes suit scissor-over-comb work and men's cuts.

-
- Japanese SUS 440C steel, 60 HRC
 - Grey titanium coating
 - Powerful hollow-ground blades with convex edges
 - Curved thumb ring for comfort
 - Thick hair, graduated cuts and beard trimming
 - 1 complimentary sharpening and full service, with no time limit for claiming it

COLLECTION ORIGIN | TEXTURISING SCISSORS

JUMP T30

A detail specialist for precise, controlled thinning.

Compact and easy to handle, these texturising scissors with 30 straight teeth allow precise, gradual thinning, removing around 30 % of hair. They suit outlines, finishing and refining blends.

Their symmetrical, reversible design lets you work with the teeth facing upwards to personalise the surface, or downwards to remove bulk deeper into the hair and soften transitions.

- Japanese SUS 440C steel, 60 HRC
- Hollow-ground blades with convex edges
- 30 straight teeth, removes around 30% of hair
- Reversible, with teeth facing up or down
- Two removable finger rests
- 1 complimentary sharpening and full service, with no time limit for claiming it
- Hand: Right-handed / left-handed
(for left-handed stylists accustomed to symmetrical handles)

COLLECTION ORIGIN | TEXTURISING SCISSORS

JUMP T40

A classic choice for powerful thinning and texturising.

The classic, symmetrical, reversible design provides a balanced grip for powerful thinning and texturising. The 40 curved teeth remove 35 to 40 % of hair, depending on the cutting direction and pressure applied.

Using the teeth facing upwards or downwards lets you work at the surface or deeper into the hair, personalise volume and soften transitions in layered cuts.

- Japanese SUS 440C steel, 60 HRC
- Hollow-ground blades with convex edges
- 40 curved teeth
- Removes 35 to 40% of hair
- Reversible, with teeth facing up or down
- Two removable finger rests
- 1 complimentary sharpening and full service, with no time limit for claiming it
- Hand: Right-handed / left-handed
(for left-handed stylists accustomed to symmetrical handles)

COLLECTION ORIGIN | TEXTURISING SCISSORS

JUMP T36L

A classic choice for thinning and texturising, exclusively for left-handed stylists.

Designed exclusively for left-handed stylists, these texturising scissors combine a symmetrical, reversible grip, two removable finger rests and decisive cutting. Their 36 profiled teeth remove around 35 to 40 % of hair to thin dense hair and texturise volume.

With the teeth facing upwards, they work on outlines and the surface. With the teeth facing downwards, they work deeper into the hair. They also support scissor-over-comb work and finishing layers.

- Japanese SUS 440C steel, 60 HRC
- Hollow-ground blades with convex edges
- Exclusively for left-handed stylists
- 36 teeth, removes 35 to 40% of hair
- Teeth facing up or down
- Two removable finger rests
- Thinning and texturising
- 1 complimentary sharpening and full service, with no time limit for claiming it
- Hand: Left-handed only
- Number of teeth

Left

COLLECTION ORIGIN | CUTTING SCISSORS

LEFT

Distinctive style, exclusively for left-handed stylists.

The handle design is exclusively suited to left-handed stylists who have learnt to cut with a dedicated grip. Easy to handle and versatile, these scissors combine comfort and precision to support everyday movements.

Hollow-ground blades with convex edges allow you to move between fundamental cuts, thinning and finishing. The removable finger rest completes the grip, with two sizes to adapt the blade length to the task.

-
- Japanese SUS 440C steel, 60 HRC
 - Hollow-ground blades with convex edges
 - Exclusively for left-handed stylists
 - Removable finger rest
 - Versatile, precise cutting
 - 1 complimentary sharpening and full service, with no time limit for claiming it

Surf

COLLECTION ORIGIN | TEXTURISING SCISSORS

SURF T33

Offset texturising scissors for power and fluid cutting.

The offset handle design naturally follows your movements to shape volume and lighten dense hair. The 33 curved teeth remove 40 to 45 % of hair for fast, controlled thinning.

These texturising scissors add movement to longer lengths and shape bulk in short and medium-length cuts. The integrated finger rest adds to the comfortable grip.

- Japanese SUS 440C steel, 60 HRC
- Hollow-ground blades with convex edges
- 33 curved teeth
- Removes 40 to 45% of hair
- Offset handle
- Removing bulk from dense hair
- 1 complimentary sharpening and full service, with no time limit for claiming it

COLLECTION

SIGNATURE

COBALT-ENRICHED FORGED VG-10 STEEL
62 HRC**

The culmination of Dune's craftsmanship, serving creativity and finely detailed finishing. Distinctive designs, lasting sharpness and a beautifully smooth glide combine to deliver precision, comfort and the pleasure of cutting.

Japanese VG-10 steel enriched with cobalt, with a hardness of 62 HRC, combines high wear resistance with strong edge retention, particularly suited to dry hair and precision finishing. Hollow-ground blades and hand-finished artisan convex edges help the scissors move gently and smoothly into the hair fibre.

The ball-bearing system provides a supple opening and closing action and helps reduce wrist fatigue and tension in the hand. One complimentary sharpening and full service are included, with no time limit for claiming them, to maintain the tool's performance.
